POLU SANJAY

Telangana, India

+91 8019769774   sanjaypolu3@gmail.com   LinkedIn   GitHub

PROFESSIONAL SUMMARY

Aspiring Data Science Intern with strong foundations in Python, Machine Learning, and Statistics. Experienced in predictive modeling, statistical analysis, and data visualization using Scikit-learn, Pandas, and NumPy. Attempt to apply data-driven problem-solving and analytical skills to real-world business challenges.

EDUCATION

B.Tech – Computer Science and Engineering 2023–2027
SR University, Telangana
Relevant Coursework: Data Structures, Probability & Statistics, Database Management Systems, Machine Learning, Linear Algebra

TECHNICAL SKILLS

Programming: Python, SQL, C
Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Machine Learning: Logistic Regression, Decision Trees, Random Forest, Classification, Model Evaluation (Precision, Recall, F1-score, ROC-AUC)
Data Analysis: Exploratory Data Analysis (EDA), Feature Engineering, Data Cleaning
Tools: Git, GitHub, Jupyter Notebook, VS Code
Languages: English, Telugu, Hindi

PROJECTS

Symptoms-Based Disease Prediction System

- Engineered an end-to-end machine learning application using 5,000+ patient symptom records.
- Data preprocessing, feature engineering, and normalization performed using Pandas and NumPy.
- Trained and evaluated Decision Tree and Logistic Regression models.
- Achieved 85% accuracy and 0.84 F1-score after hyperparameter tuning.
- The trained model was deployed using Flask for real-time disease prediction.

Customer Churn Prediction System

- Built a classification model on 7,000+ customer records to predict churn probability.
- Conducted Exploratory Data Analysis to identify key churn drivers.
- Applied feature encoding and scaling techniques to improve model performance.
- Trained Logistic Regression and Random Forest models, achieving 0.82 ROC-AUC.
- Derived actionable insights to support customer retention strategies.

EXPERIENCE

Python Programming Intern – InternPe

- Automated structured data processing workflows, reducing manual effort by approximately 30%.
- Integrated REST APIs for data extraction and transformation.
- Processed datasets containing 10,000+ records using Python.
- Strengthened analytical and algorithmic problem-solving skills through real-world tasks.

Virtual Experience – Forage (Walmart & Deloitte)

- Completed simulations in Data Analysis, data mining, and Relational Database Design.
- Applied structured problem-solving approaches to real-world business case scenarios.
